

Summary of Contribution of The Radio Astronomy group in Radebeul (Germany) at the **Fifth International Congress for Radio Astronomy** in Heidelberg (Germany)

Sept. 4 - 6 2009

Hans-Georg Zaunick
Ullrich Kunze
Andreas Großmann

- We demonstrated the remote control via internet connection of the radio telescope in Radebeul
- We demonstrated the use of a low-bandwidth video streaming from remote site to the steering client
- We suggested to set up a Wiki for the for the purpose of communication and documentation of the developments and the standards inside ERAC as well as presentation of our work to the public

Our suggested Control Scheme (which uses only open source, public domain, platform independent and professionally qualified components):
